

Clean Copy of Claims Required by 37 C.F.R. 1.121.

1. An ophthalmic lens element comprising:

an injection molded, polymeric ophthalmic lens having a concave surface and a convex surface, and

a laminate bonded to the injection molded, polymeric ophthalmic lens, the laminate comprising, in the following order:

- a) a first resinous layer,
- b) a functional layer selected from the group consisting of a light polarizing layer and a photochromic layer, and
- c) a second resinous layer,

the first resinous layer being bonded to the convex surface of the injection molded, polymeric ophthalmic lens.

2. The ophthalmic element of claim 1 wherein said polymeric ophthalmic lens consists essentially of a polycarbonate resin.

3. The ophthalmic element of claim 1 wherein the first resinous layer is directly bonded by fusion to the polymeric ophthalmic lens.

4. The ophthalmic element of claim 1 wherein the first resinous layer consists essentially of polycarbonate resin and is adhesively bonded to the polymeric ophthalmic lens.

5. The ophthalmic element of claim 1 wherein the first resinous layer consists essentially of polycarbonate resin and is fused to the polymeric ophthalmic lens.

6. The ophthalmic element of claim 2 wherein the functional layer comprises a light polarizing layer.

7. The ophthalmic element of claim 2 wherein the functional layer comprises a photochromic layer.

A2
cont

8. The ophthalmic element of claim 4 wherein the functional layer comprises a light polarizing layer.

9. The ophthalmic element of claim 4 wherein the functional layer comprises a photochromic layer.

10. The ophthalmic element of claim 2 wherein the injection molded, polymeric ophthalmic lens has no ophthalmic prescription power.

13. The ophthalmic element of claim 7 wherein the injection molded, polymeric ophthalmic lens has no ophthalmic prescription power.

14. The ophthalmic element of claim 2 wherein the first resinous layer comprises a thermoplastic polymer.

15. The ophthalmic element of claim 6 wherein the first resinous layer comprises a thermoplastic polymer.

16. The ophthalmic element of claim 7 wherein the first resinous layer comprises a thermoplastic polymer.

24. The ophthalmic element of claim 1 wherein layer b) is an extruded layer.
25. The ophthalmic element of claim 1 wherein layers a), b) and c) are extruded layers.
26. The ophthalmic element of claim 4 wherein layer b) is an extruded layer.
27. The ophthalmic element of claim 4 wherein layers a), b) and c) are extruded layers.
28. The ophthalmic element of claim 8 wherein layer b) is an extruded layer.
29. The ophthalmic element of claim 8 wherein layers a), b) and c) are extruded layers.
30. The ophthalmic element of claim 12 wherein layer b) is an extruded layer.
